This website is designed to present a comprehensive overview of antennas, from design, to measurement and theory. Mon, 16 Apr 2018 20:03:00 GMT The Antenna Theory Website - In radio, an antenna is the interface between radio waves propagating through space and electric currents moving in metal conductors, used with a transmitter or receiver. In transmission, a radio transmitter supplies an electric current to the antenna's terminals, and the antenna radiates the energy from the current as electromagnetic waves ... Tue, 17 Apr 2018 18:57:00 GMT The mystery of GM3HAT's Crossed Field Loop (CFL) Antenna - In radio and telecommunications a dipole antenna or doublet is the simplest and most widely used class of antenna. The dipole is any one of a class of antennas producing a radiation pattern approximating that of an elementary electric dipole with a radiating structure supporting a line current so energized that the current has only one node at ...
